## RM SERIES CARTRIDGE STYLE MANIFOLD INLINE REGULATORS

The RM Series Manifold Inline Cartridge Style regulators are "Pressure Compensated" Single Stage design (Oxygen is Two Stage) and are able to deliver stable pressure performance comparable to a two stage design. The unique cartridge design allows for fast, easy replacement of vital internal parts (seat, nozzle, filter, spring, seals, and built in check-relief valve) without having to remove the bonnet. The cartridge can be replaced without costly down time or removal of the regulator from the pipeline.

**NOTE: Maximum inlet pressure of 3000 PSIG.**

- Forged brass regulator body and bonnet
- Field replaceable seat cartridge
- RM-Pressure Compensated Bonded neoprene seat with broad face nozzle
- 2-3/4" reinforced neoprene diaphragm
- 2-1/2" diameter gauges
- One year warranty
- Made in USA

## WSR SERIES LINE STATION REGULATORS

The WSR Line Station regulators utilize a large diaphragm for high sensitivity and provide extremely accurate delivery pressure.

**NOTE: Maximum inlet pressure is 200 PSIG.**

- Machined brass body
- 2" dual scale gauge
